## About Me

---

I started coding in 2020 (class 10) when the Covid 19 pandemic started. I coded a discord bot with many functionalities, which made me super interested in coding. I initially began with Python. Now, I also know C, C++, JS, React, and Rust. I'm interested in learning more about machine learning models and the inner workings of computers in depth. My hobbies include competitive programming (Codeforces Peak Rating: 1471), playing guitar, and cubing. I grew up in Kuwait, did my class 9 and 10th in Mumbai, and 11th and 12 in Jaipur, while preparing for JEE mains + adv.

## Skills

---

Python | C++ | C | Java | Rust

Web Development : MERN Stack

Competitive Programming : Codeforces (Peak 1444 - darelife)

## Education

---

- **Indian Educational School**, Bharatiya Vidya Bhavan, Kuwait 2008 – 2019
- **RN Podar School**, Mumbai 2019 – 2021
- **Apex International School**, Jaipur 2021 – 2023
- **BITS Pilani KK Birla Goa Campus**, Goa [CSE] 2023 – 2027

## Projects

---

- 1. Aciax : Organized Display of Educational Resources** Github : Website  
A website that displays resources and checklists for all subjects, for BITS Pilani, Goa Campus (NextJs, Typescript)
- 2. Multi-variable Equation Solver** Github  
Used the Gauss Jordan method to create a reduced row echelon, and solve a multi variable equation. (C++)
- 3. Synanit : Discord Bot for Codeforces** Github  
A discord.py bot with commands tailored towards Codeforces. (Python)
- 4. Better CS Rankings** Data : FrontEnd : Website  
Created a lite version of csrankings in a hackathon by only considering Q1 journals, and A/A\* conferences as they are highly reputed, while not being too expensive for south asian professors. (Python, NextJs, Typescript)
- 5. Algomaniax Website** Github : Website  
A website for the competitive programming club of BITS Goa, Algomaniax (NextJs, Typescript)
