

PRAKHAR BHANDARI

B.E. (Hons.) Computer Science · BITS Pilani, Goa Campus · Class of 2027
f20230458@goa.bits-pilani.ac.in | +91 9136540772 | GitHub | Codeforces | CGPA: 8.42

EDUCATION

BITS Pilani, Goa Campus

2023 – 2027

B.E. (Hons.) Computer Science · CGPA: 8.42

Relevant Coursework: Digital Design, Database Management Systems, Data Structures & Algorithms, Object Oriented Programming, Computer Programming

WORK EXPERIENCE

Software Engineer Intern | Google

May 2026 – Aug 2026

- Interned in GCP Datastream, a serverless Change Data Capture (CDC) and data replication service.
- Automated source reader error mappings to eliminate false-positive system alerts and restore accurate SLO telemetry.
- Built an on-call telemetry dashboard mapping SLO fast burns against pod rollouts to accelerate failure diagnosis.

Software Engineer Intern | AI Gurukul

May 2025 – Jul 2025

- Developed AI agents using CrewAI and Gemini API with PostgreSQL for XPiA, E-Library, and Instagram Automater.
- Implemented a PDF RAG pipeline combining BM25 keyword matching and vector search to reduce LLM hallucinations.

PROJECTS

XPiA Attack – Agent Exploitation Demo

Jun 2025 – Jul 2025

- Simulated an automated Cross Platform Injection Attack (XPiA) where an AI agent interacts with malicious prompts to extract sensitive data and manipulate a Supabase Postgres database.
- Integrated CrewAI and Gemini API for natural language understanding and prompt-driven attack simulation.
- Built custom Python tools for prompt parsing, HTTP request handling, file operations, and attack scenarios.

PacMan: Network Packet Analyzer

Mar 2025

- Secured 2nd place out of 200+ teams in a 24-hour hackathon building a web-based PCAPNG packet analysis tool.
- Built with Next.js, Flask, Scapy, and Pyshark to capture packets, filter traffic, and stream real-time metrics (latency, jitter, packet loss) to an interactive frontend.

Codeforces Helper – Browser Extension

Dec 2024 – Apr 2025

- Chrome and Firefox extension serving 2,000+ active users to enhance competitive programming workflows.
- Features contest tracking, tag hiding, multi-user rating graphs, and question bookmarking using JavaScript.

Sing Assist – Real-Time Audio Analysis

Feb 2026 – Apr 2026

- Built a real-time pitch tracker in Go using FFT and pYIN algorithms to extract fundamental vocal frequencies.
- Implemented moving-average pitch smoothing and frequency-matching logic to score live audio input.

Multi-Variable Equation Solver

Jan 2024

- Built a C++ CLI tool to solve linear equation systems via Gauss-Jordan Elimination with step-by-step output.
- Used determinant checks and RREF to detect singular and inconsistent systems.

AWARDS & RECOGNITIONS

Expert on Codeforces (Peak Rating: 1643) | Handle: darelife

Jun 2025

- Solved 714+ competitive programming problems and competed in 55+ contests.

LEADERSHIP & EXPERIENCE

AlgoManiaX (Competitive Programming Club, BITS Goa) | Sub Coordinator

Mar 2024 – Present

- Developed the official AlgoManiaX website and a Discord Bot hosted on Google Cloud VM for club operations.
- Created Manim animation videos for problem explanations; POC for BGCL 6.0 and automated social media updates.

Peer Mentorship Program (PMP) | Mentor, Social Services

Aug 2024 – May 2025

- Mentored 6 first-year students to guide academic adaptation and college resource accessibility.
